

# 1.Create a Cloud Object Storage instance and several buckets

- 1.From the [IBM Cloud catalog](#), search for Object Storage, then create a Cloud Object Storage instance.
- 2.Select **Buckets** in the navigation pane.
- 3.Create as many buckets as you need.

## 2.upload 5 images to ibm object storage and make it public

- 1.Create a bucket with a unique name to store your images. For **Location**, select the location that matches the region where you want to import images.
- 2.With your bucket created, you can upload an image by clicking **Add Objects**.

Image Templates

Filter Import Image From Swift Import Image From IBM COS

IBM Cloud Object Storage: Cloud Object Storage-aa2

Location: us-south

Bucket: my-bucket

Image File: my-Image.vhd

Image Name: myNewImage

IBM Cloud API Key: my-api-key-that-has-access-to-IBM-COS

Operating System: Ubuntu 18.04-64 Minimal for VSI

Boot Mode: HVM

Notes: Optional: notes

Encryption: ☐

Cloud Init: ☒ Your License: ☐

Cancel Import

- Upload images from a web browser to the Object Storage bucket.
- View the images in the Object Storage bucket in a web browser.

### 3.upload CSS page to the object storage and use the same html code.
